FOUNDER · BUILDER · BAKU

Emin İsmayılov

I build local-first AI and privacy-first tools that stay on your machine.

- 6 years full-stack
- Currently Senior Project Manager at Rentbutik

SELECTED WORK

The things I build.

SHIPPED

Dot

A private, local AI companion for macOS. It listens, sees the screen when asked, and answers with Qwen3.8 27B entirely on your Mac.

Swift · Local model · macOS

STUDIO

Studio

Small, honest games and web products. No ads, no dark patterns.

OPEN SOURCE

Rust + WASM

Five local-first tools that run in the browser, not on a server.

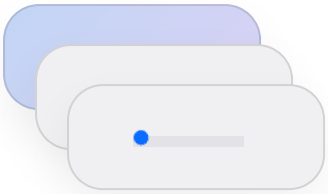

CONCEPT

Adboard

A reward-for-watching-ads app: people choose the ad, then get the reward.

CONCEPT

AlHub

A simple home for local AI models and the tools that run them.

IDEA

Crowdfunding platform

A way for local makers to fund, pre-sell and ship what they build.

AT A GLANCE

Code first. Products second.

6 yrs Full-stack development, 2018–2023	**6** Education and agile ventures founded
4 Languages: AZ, EN, RU, TR	**2017–21** BSc Mechatronics & Robotics, AzUAC

PROJECTS & VENTURES

Things I’m building.

Some are shipped. Some are live. Some are ideas I can’t stop thinking about.

SHIPPED

Dot

A floating AI companion for macOS. Dot listens when you click, speaks with a local voice, and can use screen context only for the conversation you started. The model — Qwen3.8 27B — runs entirely on your Mac.

Model	Qwen3.8 27B · local
Voice	On-device
Privacy	Screen context never uploaded
Platform	macOS

Dot on GitHub | Latest release

LIVE

Studio

A catalog of small, honest games and web products. Vanilla JavaScript, zero dependencies, no ads. Cozy Nook, Quiet Tiles, Ruleshift and Scriver-i-şkola are live.

Studio hub | Play Cozy Nook

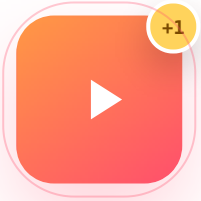

OPEN SOURCE

Rust + WebAssembly

Local-first tools that do their work in the browser: no upload, no account, no server round-trip. Built with Rust compiled to WebAssembly.

locale	live code
deliver	live code
shift	live code
gather	live code
phototrace	live code

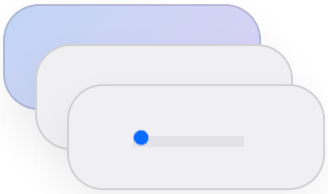

CONCEPT

Adboard

Reward-for-watching-ads. Instead of interrupting people, Adboard lets them choose a short ad and receive a real reward for the attention.

CONCEPT

AIHub

A calm home for local AI: find a model, see what runs on your hardware, and open the right tool without the noise.

OPEN SOURCE

</>

More tools

Accessibility checks, small browser utilities and a native macOS research workspace.

accessproof toolbench deepdesk

IDEA

Crowdfunding

A platform for local makers to raise a first round, pre-sell the thing they are building, and keep backers close to the work.

ABOUT & EXPERIENCE

Six years of shipping.

I started as a full-stack developer in 2018. Since then I've founded education and agile ventures, led delivery teams, and kept building my own products.

SENIOR PROJECT MANAGER

Rentbutik

Senior Project Manager since August 2026. Delivery leadership, sprints, QA and UX.

Since Aug 2026 Baku

LANGUAGES

Four languages

AZ Azerbaijani	EN English
RU Russian	TR Turkish
